- 6-slot charging dock
- Parallel device charging
- 4.2 V / 2 A per channel
- 60 W maximum power

The DOCK-665-01 is a 6-slot charging dock for the Topicon MDT665. It is designed for charging multiple devices in parallel, making it especially suitable for fleets, depots and central issue points.

The dock operates with AC 220 V at 50 Hz and a maximum power consumption of 60 W. It provides a DC output of 4.2 V / 2 A per channel.

An efficient charging solution for environments using multiple MDT665 devices.

Compatible with: Topicon MDT665, Topicon MDT680
